Abstract of **TW497055B**

The method of the present invention comprises: linking a digital music player to a digital music index database in the network; downloading digital music index table from the digital music index database to the digital music player; operating the digital music player and selecting a part of the digital music index table to form a to-be-downloaded digital music list; operating the digital music player to download the to-be-downloaded digital music from the network to the digital music player. The system of the present invention comprises: a database website, dedicated connection apparatus and digital music player in the network; the database website at least comprising a digital music index database stored with a plurality of digital music index tables; the digital music player comprising a function of connecting to the database website via the dedicated connection apparatus for downloading the digital music index tables, a function of selecting a part of the digital music index table to establish the to-be-downloaded digital music list, and a function of connecting to the network via the dedicated connection apparatus for downloading the required digital music.
